1 Answer key

2 Scoring the knowledge check

3 Running the practical exam

4 Awarding the certification

Rev 1.0 • October 2026

Keep this away from candidates. This key is for lead techs and managers. Don't leave it on the bench or share the file.

1 Answer key

#	Answer	Why
1	**C** — In the student's own words	The bench needs the real symptom, as described.
2	**A** — Student first/last name, ID, grade, model, complaint	The portal won't save a desk ticket without them.
3	**D** — Repaired - Ready for Pickup	Only Ready for Pickup tickets can be handed over.
4	**B** — Who picked it up, their relationship, and that you checked ID	The pickup record protects everyone.
5	**B** — Incident IQ	All Chromebook assignments, loaner or permanent, are in Incident IQ. Destiny is only for accessories.
6	**D** — Destiny: Circulation → Check Out Items → To Patron	Calculators, chargers and similar items are tracked in Destiny.
7	**A** — Stop and get the lead tech or librarian	Overrides need permission and a reason.
8	**C** — It links the ticket to the device's history	Asset history is how the district spots repeat failures.
9	**D** — No checkout without the physical ID card	Destiny checkouts need the physical student ID card.
10	**B** — Scan the barcode on their ID card, or ask for their student ID	The ID card barcode or student ID number finds the student and their assigned devices.
11	**C** — The bench confirms the tier after diagnosis	The tier depends on what's actually wrong.
12	**A** — The student or their family	It shows private repair information.
13	**A** — Don't power it on; get it to a Tier 3 tech right away	Speed matters; no power.
14	**C** — Use Request missed hours so a manager can approve it	Only managers edit timecards.
15	**D** — Get the lead tech; don't change the assignment yourself	Lost and stolen devices are handled by staff.

2 Scoring the knowledge check

- One point per question. Score 80% or better (12 of 15).
- Go over every missed question with the candidate, using the "Why" column, before they leave.
- A candidate who misses the pass mark can retake a different-order version after a week. Shuffle the answer letters when you reprint.

3 Running the practical exam

- Allow about 40 minutes. Set up the devices and any planted faults before the candidate arrives.
- Watch, don't coach. Step in only for safety.

- Mark each task Pass or Fail against the "To pass" column. All tasks must pass.
- Any automatic-fail item ends the exam immediately.

Task	Set up beforehand	Watch for
Check-in	Role-play customer with a device that won't charge.	Greets, quick checks, photos, complete portal ticket, iiQ ticket if required.
Loaner	Assign a loaner Chromebook in Incident IQ, and check out a charger in Destiny.	Student found in iiQ by ID card or ID number; Chromebook assigned to the right student; charger checked out in Destiny only after seeing the physical ID card; any block handled properly.
Lookup	Find a ticket by student ID and tell the customer its status.	Finds it quickly; explains the status in plain words; no private info shared.
Pickup	Hand back a Ready for Pickup device.	ID checked, pickup recorded, loaner checked in and own device assigned in iiQ, accessories checked in in Destiny.
Problem customer	Role-play: the asset in iiQ is assigned to a different student.	Stops and escalates; doesn't guess or change the record.

Automatic fail items. Handing a device to someone without checking ID; Sharing a student's information with another student; Checking a Chromebook out in Destiny instead of Incident IQ; Checking anything out in Destiny without the physical student ID card; Overriding a Destiny block without permission; Powering on a wet device; Changing timecards or asset records without permission.

4 Awarding the certification

- Check every requirement on the sign-off page is signed, including the prerequisite.
- Sign and date the candidate's sign-off page.
- In the portal, open Certifications, find the candidate, and click the box for this certification. It's recorded with your name and the date, and logged.
- If a certified student has a safety violation or repeated comebacks, remove the certification in the portal (click the check again) and note why in the audit log reason or the student's file.
